Nearly 500 participants have completed the LLU School of Dentistry AAID MaxiCourse program.
WHY LOMA LINDA UNIVERSITY?
For more than 30 years, the Advanced Education Program in Implant Dentistry through the Continuing Dental Education Division has provided part-time didactic and clinical training in implant dentistry to general practitioners and specialists.

The 2017 LLU/AAID MaxiCourse® offers 300 hours of lectures, hands-on workshop sessions, live surgical demonstrations, online lectures and clinical experiences placing dental implants on participants’ patients. The LLU/AAID MaxiCourse® brings the experience of renowned instructors and clinicians from Loma Linda University and around the world.

Hands-on Sessions
- Pig jaw GBR surgery workshop instructed with Dr. Istvan Urban
- Bicon workshop using short implants
- Cadaver surgery - Bone grafting techniques and head anatomy dissections instructed with Dr. Matteo Chiapasco
- Zimmer Institute workshop - Simulation laboratory in implant placement and prosthodontics
- Nobel Biocare workshop - Guided surgery
- Dentium workshop - Implant placement and maxillary sinus grafting techniques
- Straumann workshop - Implant placement and prosthodontics

The 10-month sessions (two days per month) also help prepare the participant to take the written portion of the AAID Associate Fellow Membership Examination. The didactic portion of the course includes information for beginners, intermediate and advanced clinicians in implant dentistry wishing to expand their knowledge in this field.

The program is designed to take the participants through a systematic learning approach of implant dentistry.

Starting with basic concepts, diagnosis, treatment planning, dental implant surgery and implant prosthodontics, the attendees have the opportunity to develop sequential treatment plans on their own patients and participate in performing surgeries with the assistance of experienced faculty and residents of the Advanced Education Program in Implant Dentistry.

The attendees also experience hands-on workshops where procedures such as cone-beam imaging analysis, simulated patient-based dental implant surgery on life-like mannequins, and guided-bone regeneration procedures on cadavers and pig jaws complete the understanding of basic and advanced dental surgical procedures.

2017 SCHEDULE

Course dates:
- March 1st-17
- April 6-7
- May 4-5
- June 8-9
- July 3-4
- August 3-4
- September 7-8
- October 5-6
- November 9-10
- December 7-8

Tuition:
- Online session dates: March 21
- April 11
- May 9
- June 13
- July 11
- August 8
- September 12
- October 10
- November 14
- Price: $15,000
